

How the NC Dental Society Can Support Operation Safe Water

Testing well water supplies in the wake of Hurricane Helene is a pressing need for many residents in North Carolina and Appalachian. While free mobile testing stations are available, they cannot reach everyone who needs to ensure their drinking water is safe. The NC Dental Society is raising awareness about *Operation Safe Water*, a pay-it-forward program created by Dentsafe and partners to provide EPA-certified water testing kits to those in need. These kits, along with distribution and water analysis services, are offered at below-cost pricing. Learn more, help spread the word, and join us in paying it forward to support communities beginning to rebuild.
